UTAH IN REVIEW – 1988

Utah's 1987 Legislature, faced with serious financial problems based on a sluggish economy and declining revenue receipts, passed the largest one–time tax increase in the state's history—more than $150 million in added sales, income, motor fuels, and cigarette taxes. This increase precipitated a strong tax protest movement, which culminated in three statewide initiative petitions that were presented to the voters in the 1988 general election.

Although the tax initiatives were rejected by the electorate, they served to focus attention on the need to restrain further tax increases by seeking greater economy in state and local government operations. A special session of the 1988 Utah Legislature enacted a one–time income tax rebate totaling $77 million and provided for other permanent cuts in the state income tax. The Governor also proposed a six–point tax limitation plan designed to limit future tax increases and work toward further tax reductions.

After several years of serious financial problems, Utah state finances improved dramatically during the past year. Not only was the state able to meet all of its legislative commitments without any across–the–board spending reductions, but it also was able to conclude the 1987–88 fiscal year with a sizable surplus. Utah ended the year with a surplus totaling $109.6 million, but most of these funds were allocated for the one–time income tax rebate and a $22.9 million transfer to Utah's surplus "rainy day" fund. After the special appropriations and transfers, the state still had an unallocated balance of $9.7 million remaining at the end of the year.

During the 1970s, Utah's population grew by 402,000 persons. Approximately 256,000 of this growth resulted from natural increases (births minus deaths), with the remaining 146,000 coming from net in–migration. This was the largest influx of new population in Utah history, and exceeded the total migration to the state between the arrival of the first pioneers in 1847 through 1910.

The net migration of population to Utah during the 1970s reversed itself the early part of the 1980 decade. Over the past four years, there was a steady out–migration of population from the state. This trend continued into 1988.

There are some signs, however, that the out–migration of population from Utah soon may be ending. Migration trends usually are a reflection of the availability of employment opportunities and economic prospects. Over the past year, the number of nonagricultural jobs in Utah rose by approximately 22,000. This is more than double the rate of new jobs created in 1986 and 1987. There are other indications (such as personal income growth and retail sales) that the economy of the state is improving.

Another encouraging sign for Utah's long–term financial future is that school enrollment growth in the state is slowing down. Although school enrollments in Utah still are rising, the year–to–year increases are less than half of what they were six years ago. If present trends continue, school enrollments should level off by 1992 or 1993 and then begin to decline for several years.

The prospect of a leveling off in overall school enrollments should help ease some of the financial pressure that has been placed on Utah education during recent years. Between 1977 and 1987, for example, public school enrollments in Utah rose by 33.5% while they were declining by 8.2% in the nation as a whole. As a result, Utah lost ground among the states in the amount spent per school child, even though total school outlays to support education were rising much faster in Utah than they were in the rest of the nation.

An analysis of consolidated state finances during the 1987–88 fiscal year shows that general revenue in Utah totaled $2,543,465,000 and state expenditures amounted to $2,491,946,000. Revenues in Utah rose by nearly $100 million last year, while expenditures decreased by slightly more than $8 million. This was the first actual expenditure decline recorded in recent Utah history.

State tax collections in Utah climbed by $123.5 million, or 8.0% during 1987–88. The increase, reflecting the tax increases imposed by the 1987 Legislature, would have been substantially greater, but, as noted, approximately $77 million was returned to the taxpayers in the form of a one–time income tax rebate. Part of the large gain in state tax revenue during 1987–88, however, was offset by a continuing decline in federal aid and revenue from other nontax sources.

The general sales tax still is the largest single tax source for the state of Utah, accounting for 37% of all state taxes and 24% of total revenue receipts. Last year, it produced $616 million for state purposes and an additional $146 million for local units of government. The property tax also is a major revenue producer ($731 million in fiscal 1988), but all of the property tax proceeds are used to finance local governments.

A tax comparison study, prepared by the District of Columbia, shows that the overall tax burden for a family of four living in Salt Lake City is between 16% and 22% higher than the U.S. average at various income levels ranging between $20,000 and $100,000. The study, which was made in the largest city of each state, shows that Salt Lake City ranked either 15th or 17th among the 51 cities at the different income levels.

Another fact brought out by the study was that the state and local tax system for residents of Salt Lake City was mildly progressive. The proportion of income going for state and local taxes for families at the $100,000 income level, for example, is about 10% greater than it is for families at the $20,000 income level. The degree of progressivity in Utah's state and local tax system is approximately the same as the average for the nation as a whole.

NOTE: Above figures are based on the sales tax revenues that are allocated to local units during the fiscal year ended June 30, 1988. Since there is a delay in remitting sales tax collections to the State Tax Commission, the data actually reflects business operations during the 12 month period ended March 31, 1988. Sales tax allocations to local units are amounts distributed after deduction of administrative expenses by the State Tax Commission. Gross taxable sales includes or reflects use tax collections as well as sales tax collections.

* Excludes expenditures for administration and for social services.

** Beginning in January, 1974, money payments for old-age assistance, aid to the blind, and aid to the disabled were paid directly by the Federal Social Security Office.

Prior to fiscal 1962, medical assistance expenditures are not shown separately. Such medical expenditures are included in program expenditures for these earlier years.

Prepared by **UTAH FOUNDATION** from reports of the Utah Department of Social Services and Utah Department of Health.

* Individual categories add to more than the total because some persons were receiving assistance under more than one program.

** Does not include old-age recipients, blind recipients, and disabled recipients who were receiving money payments through the Federal supplemental security income program. These adult assistance categories were transferred to the Federal Social Security office on January 1, 1974.

Cases eligible for medical assistance only.
